Glencroft Sheepskin Rug Cleaning Instructions

DRY CLEANING – These rugs are dry cleanable by professional dry-cleaners

GENERAL CARE – 3 SIMPLE STEPS

1. **BEAT AND SHAKE** – Take your rug outdoors and give it a very good shake to remove dust and other dirt particles. If required ‘beat’ the rug with a broom handle or similar implement.
2. **BRUSH** – Brush your rug with a strong ‘slicker’ brush (image right) – you can buy these in pet shops sold as ‘dog brushes’. This will remove dust and also make your rug fluffy again if it has gone a bit flat. It is normal for some wool to come off on the brush.
3. **VACUUM** – Once shaken and brushed, run a vacuum cleaner over your rug to pick up all other dust and other dirt particles.

We usually find that these 3 steps are sufficient to keep your rug clean for many years without the need for other washing or laundering.

LAUNDERING – AVOID ALL HEAT!

These sheepskin rugs can be machine or hand washed if essential using the following instructions. Please note washing can remove natural oils from your sheepskin rug making your rug feel slightly less soft.

<p>1 Pre-soak in COLD water to 30°C maximum, using a MILD WOOL detergent.</p>	<p>4 Comb wool while still damp.</p>
<p>2 Gently hand wash OR wash on your machine’s WOOL CYCLE in cold water (30°C maximum).</p>	<p>5 Slow drying will give the best results for your sheepskin rug. Hang to dry over two lines away from direct sunlight or artificial heat like radiators.</p>
<p>3 Rinse until the water is clear. Spin dry on the SLOWEST SPIN CYCLE to remove excess water.</p>	<p>6 When nearly dry, stretch by hand in all directions and finally to the required shape</p>

NB: Please note this does not apply to Glencroft ICELANDIC sheepskin rugs which are not machine washable.
